NSP-50 Condensate Neutralizing Pump

The NeutraSafe® NSP-50 Neutralizing Condensate Pump has long been trusted in HVAC and plumbing systems for its power, performance, and reliable serviceability in managing and treating acidic condensate in high-efficiency heating equipment. The integrated neutralizing media and Little Giant VCMA pump effectively protect piping and septic systems from infrastructure damage produced by wastewater, while helping to prevent environmental pollution.

- ◆ Little Giant Pump VCMA-20ULS
- ◆ Up to 500,000 BTUs of input
- ◆ Patented serpentine design of neutralization chamber allows for longer exposure of acidic condensate with Neutra-pH media for enhanced performance
- ◆ 20 feet of lift, mounted on custom base, low profile (3.5" x 7" x 19")
- ◆ 3 separate inlets for A/C, dehumidifier, and other non-acidic condensates
- ◆ Neutra-pH media contained in a fabric sack for easy maintenance and recharge
- ◆ Clear snap off lid on neutralizing chamber provides easy visual inspection of the media
- ◆ No tool required to recharge
