CONDENSATE NEUTRALIZERS

## 2025 PRODUCT OVERVIEW

CONDENSATE  
NEUTRALIZERS

DIGITAL  
CONTROLLERS

NEUTRALIZING  
PUMPS

# What we do best

NeutraSafe has spent over a decade creating innovative solutions that use natural media to neutralize acidic condensate. We help HVAC pros not only protect equipment and plumbing systems, but use earth-based materials to protect natural ecosystems as well.

## Our secret is our stones

Our proprietary blend of 98% pure calcite stones, combined with a touch of magnesium oxide, are mined directly from the earth. These natural minerals are irregularly shaped, providing a larger surface area which maximizes neutralization and prevents clogging.

## Recharge Kits

Using only the highest quality materials and components, our recharge kits give you the fastest, easiest way to maintain our condensate neutralization solutions. Just remove the old sock and slide the new kit into your neutralizer tube in seconds.

- We've engineered each kit to make changing our natural Neutra-pH media clean and easy
- Kits come preassembled in medical-grade socks with stainless steel rings on each end
- These are non-hazardous, and old media socks can be thrown out with regular household trash

## CLEAR TUBE CONDENSATE NEUTRALIZERS

NeutraSafe® tube-style condensate neutralizers are available in six sizes from 220,000 to 2 million BTUH. These patented units feature easy-to-service designs and can be detached without affecting the drain line.

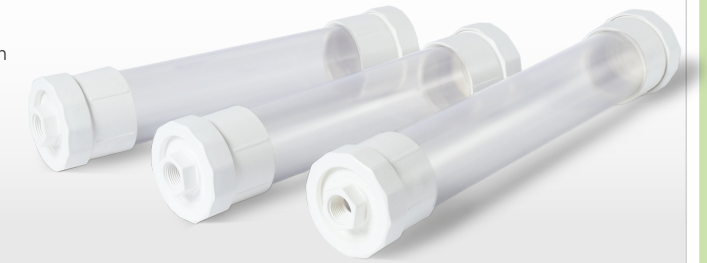

For our full line of tube-style condensate neutralizers, go to [neutrasafe.com](http://neutrasafe.com)

### Features:

- Bi-directional
- Horizontal or vertical installation depending on model
- Integral O-ring unions

### Includes:

- Media filled sack
- PVC adapter fittings
- Snap-in Brackets

## BB60 BOOSTER BOX DIGITAL CONTROLLER

The all-new NeutraSafe® BB60 Booster Box Digital Controller is perfect for any size closed-loop hydronic system. This cutting-edge Glycol or Solution Feeder comes with a digital display, marine-grade poly connections and fittings. The BB60 Booster Box has the ability to connect to any size feed tank, and can also fill and purge the system.

### Features:

- Glycol or solution feeder
- Digital display
- Cut in/cut out (max 50psi)
- 120v plug
- Marine-grade poly connections & fittings
- Connect to any size tank
- Ability to fill and maintain the system

## HIGH-CAPACITY CONDENSATE NEUTRALIZERS

NeutraSafe® tray/tank configurations are available with capacity guidelines of 5 million and 6 million BTUH. Utilizing the same media as the clear tube neutralizers, the high-capacity tray/tank neutralizers are the solution for larger high-efficiency, gas-fired appliances from 5 million to 6 million BTUH. The tray and tank are molded in polyethylene making them extremely durable.

### Tray Condensate Neutralizer:

- Low Profile 3.25" to center of inlet and outlet
- Bi-directional, patented serpentine design
- Neutra-pH contained in 3 fabric sacks
- Roto-molded for extreme durability
- Removable, UV-resistant cover

### Tank Condensate Neutralizer:

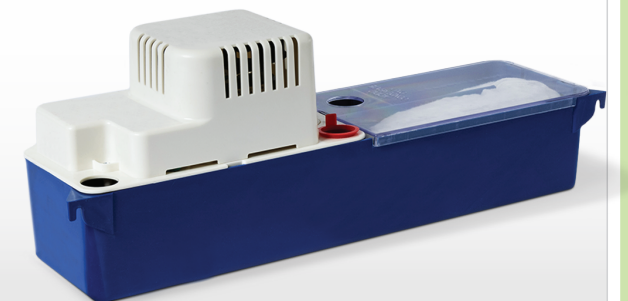

- Large capacity for commercial applications
- 1" female NPT tapplings
- Roto-molded for extreme durability
- Includes 3 media filled sacks
- 5" vented cap

## NSP-50 CONDENSATE NEUTRALIZER PUMP

The NeutraSafe® NSP-50 neutralizing condensate pump has a guideline capacity of 500,000 BTUH of appliance input. Paired with the Little Giant VCMA pump, our Neutra-pH media is contained in a sack and placed within a patented serpentine neutralization chamber.

- Reliable, industry trusted
- 3 separate inlets for A/C and dehumidification condensate
- 20 feet of lift
- Mounted on custom base
- Low profile (3.5" x 7" x 19")
- Patented serpentine chamber
- Clear snap off lid
- No tools required

# We give contractors a big boost of confidence

NeutraSafe was founded with a keen focus on helping HVAC contractors, plumbers, and even code inspectors operate with total confidence. We're committed to doing everything we can to make the job easy for contracting pros.

- ◆ We're experts that focus only on neutralizing solutions—nothing else
- ◆ We provide innovative products with exceptional quality at a fair price
- ◆ Our products are easy to find, buy, install and service for any pro
- ◆ We help contractors truly protect our natural resources and the environment

"Our year round and seasonal homeowners trust us to take care of their homes with the most reliable products. We use NeutraSafe because we know their products will neutralize acidic condensate more efficiently than any other product on the market. They do things differently and they have a support structure that is second to none."

**Tom Littlefield**

Vice President  
Garrett Pillsbury Plumbing & Heating  
Kennebunk, ME

"We use NeutraSafe on all our condensing gas boiler installations and stock their NSP-50 system and Recharge kits in our shop and trucks. Our 120-year success comes from using the best products available, and NeutraSafe delivers with high-quality components and a simple, safe system. Their natural calcite stones are superior, never breaking down or clogging pipes like other products on the market."

## How to buy NeutraSafe products and recharge kits

- 1 Locate the model number for your product or recharge kit**  
The model number for your product or recharge kit is available on the individual product pages on [neutrasafe.com](http://neutrasafe.com)
- 2 Go to the How To Buy page on [neutrasafe.com](http://neutrasafe.com)**  
On the How To Buy page, enter your location using the drop-down option
- 3 Select the regional distributor from the list provided**  
Contact your local representative or distributor and tell them you want to neutralize your condensate naturally with NeutraSafe products

If you have questions or are experiencing issues contacting your distributor, call us at 781-616-3951
